

# Reuter Stokes Helium-3 Proportional Counter RS-P4-0406-212

## product overview

### Time-of-Flight Spectroscopy

Advantages of this Helium-3 filled proportional counter include:

- Small Size
- High Neutron Sensitivity
- Excellent Spectral Resolution
- Low Operating Voltage
- Short Jitter Time

### Precision Performance

Helium-3 purification techniques and manufacturing process control were developed to ensure precise matching of operating characteristics among large batches of counters. This permits parallel operation of large numbers of detectors without need for separate power supplies or gain matching.

### Customizable Solutions

This detector has a 1.27 cm diameter and a sensitive length of 15.24 cm. Detectors are available in lengths from 7.00 cm to 60.00 cm.

### Sample Specifications

This proportional counter is a sample of one of over 10,000 neutron counter designs we have manufactured. Please contact us if your application requires modification of the specifications given here.

### Typical Counting Arrangement

Type MHV Connector mates with any series MHV plug such as UG-932/U
